DETAILED ACTION

1. Claims 1-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. The use of terms such as "using", "etc.", "for processing by MCVD technique", "usual method" do not specify any positive manipulative method step(s) and hence vague and indefinite as what is being claimed. Note that the substance of Claim 52 is not even a proper limitation as it claims a goal of the invention rather than any substantive manipulative step(s) required of method claims.

If the claims are properly amended to obviate the deficiencies noted above, the claims would be allowable.
